

OVERVIEW

InterCall Mobile Assistant

Want a simpler way to connect to meetings when you're on the go? Or do you need an easier way to organise the dial-in numbers and pass codes for several different meetings? Now Mobile Assistant, a free* service from InterCall, gives you one-touch dialling into your conferences from your mobile phone.

Conferencing for a Mobile World

It's a situation most of us have experienced—you need to attend a meeting when you are not able to be in a traditional 'office' setting. Whether you're heading to another meeting, don't have access to a landline phone or are called out of the office unexpectedly, you need to join the meeting and need to do it while you're on the road.

InterCall's Mobile Assistant is an easy-to-use solution that will keep you connected.

- + One-click access**
Access an audio conference with the click of a single button or tap of a screen on your smartphone. Based on your phone's OS, the application will either dial-out to you or it will dial you directly into your conference.
- + Store conference profiles**
Store up to hundreds of unique sets of audio conferencing details. Let your smartphone keep track of dial-in numbers and conference codes.
- + Multi-platform support**
Support for numerous phones including Apple iPhone, BlackBerry and Android.
- + Join as leader or participant**
Start a conference as the leader or join a conference as a participant. You indicate the details when creating conference profiles.
- + Leader conference controls**
Manage your audio conference directly from your smartphone with access to numerous conference controls. You are able to mute and unmute, disconnect individual participants, record your call, dial-out to participants and much more.
